

Make sure your blood is safe for recipients

Dear donor :
We appreciate your humanitarian gesture to approach blood bank.
To ensure the safety of the donated blood, you will be asked to fill a form that includes personal information and health status check.
Please answer the questions with credibility and transparency.

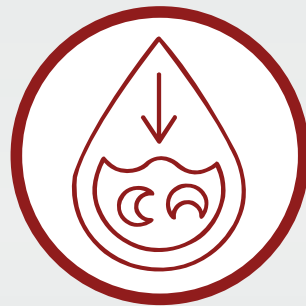

As a precautionary measure by the blood bank, prospective blood donors with following conditions will not be accepted for donation:

Using medications and bodybuilding supplements without consulting a doctor.

Found positive for any of the infectious diseases transmitted through blood (AIDS, Hepatitis B, Hepatitis C, and Syphilis).

Diagnosed with inherited blood diseases or anemia.

If less than 18 years old.

Having extra marital sex or being homosexual.

Sharing injections with others.

If you intend to test your blood for infectious diseases, you are requested to attend specialized counselling/ voluntary testing centers with such services.
