## Procedure of Rehabilitation Patient Treatment

### 1. Introduction

Rehabilitation Treatment is a safe holistic approach used to treat patient symptoms and it is determined by the findings of the initial assessment. Treatment includes understanding different approaches towards patient's problems and knowledgeable of different treatment protocols

### 2. Scope

It is applicable for all the rehabilitation professionals working in government and private sectors.

### 3. Purpose

The procedure is developed to ensure standardized safe and effective approach in dealing with wide scope of clinical presentation.

### 4. Definitions

**4.1 Treatment plan:** The plan for treatment should be reflected from the assessment phase and reasoning should be performed in order to link assessment with treatment. Rehabilitation treatment should be only based on scientific approach and clinical observations.

### 5. Procedure

In the first visit and after identifying accurately the potential problems the rehabilitation professionals shall:

- 5.1 Discuss the detailed plan of treatment with the patients and ensure clients understand all aspect and agree to the plan.
- 5.2 Ensure that all potential problems have been covered in short- and long-term plan
- 5.3 Ensure that full management procedure is performed and reassessment is done to ensure effective approach.

5.4 Ensure that patient has been educated sufficiently regarding problem, treatment and prevention.

5.5 Ensure that home program has been given to ensure continuity of the treatment

5.6 Documentation of treatment given in electronic database system as per MOH regulation.
